**This is the problem**

**You are moving into your first home a 2 bedroomed apartment and need to stick to your budget whilst working out what you will spend your money on**

You are moving into your first home, a cosy one bedroom apartment.

You have 10 minutes to have a virtual tour of your new home. You need to budget for all the necessary things you will need to move in.

As a team decide on and agree what are the most important things to spend your money on. Your budget is £2000. You must not overspend. All the items are low to mid range and price.

Some things to consider are:

- Are there items you would like but cannot afford?
- Could you wait and save up?
- How could you reduce your costs?
- Could you save money by shopping elsewhere?
- Some items are expensive to run? Can you identify which ones?

A classroom pack is available with a series of playing cards depicting all the items and prices for you to choose from.
