

Level 3 Surveying Technician Programme

Who is the programme for?

This programme is for anyone aged 16 and above with a keen interest in property and construction. There are no prior qualifications required, although you will need to attend an interview during the application process to confirm you are committed to the programme and profession. You will also need to secure employment with a company that can provide you with surveying experience; this is something we can help with.

What will you learn on the programme?

Core Units

- Health & Safety
- Data Management
- Law
- Construction Technology
- Sustainability
- Economics

Optional Units (Choose 2)

- Valuation & Appraisal
- Building Pathology
- Land, Property and Planning Law
- Procurement & Contracts
- Costing & Cost Planning of Construction Works

These are the topics you'll study and gain skills in. The optional units you can choose will depend on what your surveying specialism will be. As well as becoming a qualified AssocRICS surveyor upon successful completion of the programme, by working through these modules you will also gain a Level 3 NVQ Diploma.

Level 3 Surveying Technician Programme

What are the benefits of the programme?

For Apprentices

For apprentices, you will fast track your career by learning and developing skills on the job. You will stand out amongst other professionals in the industry as an AssocRICS member and completing this programme will open the door to becoming a fully chartered RICS surveyor.

For Employers

For employers, hiring an apprentice allows you to upskill your workforce at the same time as they contribute to your business. Having qualified RICS professionals also encourages trust with clients and can help to distinguish your business.
